TURF FERTILIZER

DIRECTIONS FOR USE:

- Apply when turf or foliage is dry.
- Water following application will enhance performance of the fertilizer.
- Slightly overlap application to avoid striping turf.
- Uniform broadcast distribution of this product is essential. Spreaders should be calibrated for accurate and uniform application of this product.
- This product may contain materials that can stain sidewalks, patios, driveways, containers, etc. Sweep or remove immediately after application if product comes in contact with these surfaces to avoid staining.
- Avoid applying targeted areas when air temperatures exceed 85 degrees.
- Avoid applying when weather conditions favor drift from target areas.
- Store the blended fertilizer product in a cool, dry place out of direct sunlight.

SPREADER SETTINGS

These settings are recommendations only. Each user should calibrate their own spreaders for proper application. Your application may vary with ground speed and wear on your spreading equipment. Bulk density, particle size (SGN) and a change in fertilizer analysis will also vary your spreader setting. To calibrate your spreader, place the proper amount of product for 500 square feet into the spreader and apply to your pre-measured 500 square feet (100 feet long by 5 feet wide) and adjust the spreader setting as necessary.
